CAUDALYSTM

Give your white and rosé aromatic length as well as crisp, saline and mineral notes

DESCRIPTION •

CAUDALYS™ is a natural specific inactivated *Torulaspora delbrueckii* produced with the dedicated Lallemand SDC PROCESS™.

The combination of the original wine yeast strain from our collection and the optimised SDC PROCESS™ leads to the unicity of this product.

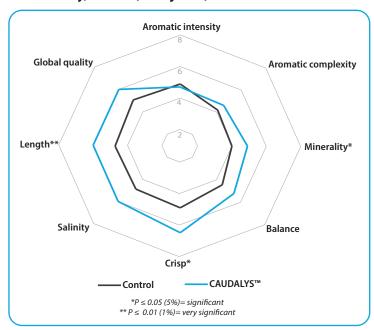

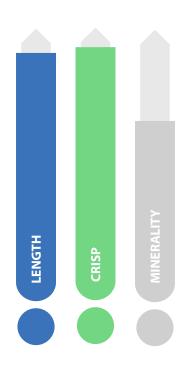

BENEFITS & RESULTS

With its specific composition, added in must or in wines, CAUDALYS™ has a unique sensory contribution. It enhances crisp, saline and mineral notes, with a better aromatic length in white and rosé wines.

CAUDALYS™ can be added to the must at the beginning of the alcoholic fermentation; it also can be used on wine during ageing and at tirage in the sparkling wine process.

Chardonnay, France (Beaujolais)

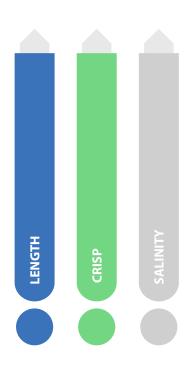

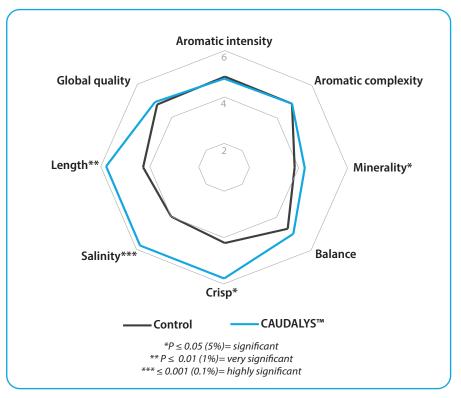

SDC™ (Specific Design Culture Process): Optimisation of the culture conditions in the upstream steps prior to inactivation/fractionation, taking into account each strain's specificities (in particular non-Saccharomyces), with the objective to maximise the quality of the biomass and its richness in targeted compounds.

Grenache rosé, France (Provence)

INSTRUCTIONS FOR OENOLOGICAL USE

Recommended dosage:

- In must, at the beginning of the alcoholic fermentation: from 10 to 30 g/hL (0.8 to 2.4 lb./1000 gallons)
- In wine: from 5 to 15 g/hL (0.4 to 1.2 lb./1000 gallons)
- Tirage wine: from 5 to 10 g/hL (0.4 to 1.2 lb./1000 gallons)

Suspend in 10 times its weight of water or must/wine before addition.

PACKAGING AND STORAGE

- 1 kg sealed alu foil bags.
- Store in a cool dry place.
- To be used once opened.
